The website that I chose to do is based on world health organization. The reason why I chose to do a website based on world health organization was because it spoke about how many people around the world are suffering with different health problems. This encouraged me to create a website based on the organization and the difference we make by changing the situation. One of the other reasons was inspired by videos I watched about the health organization and how much of an impact they have been to people around the world.

The idea or goal of the website is to create change help the people in need. The other idea or aim that is to create awareness to people and to influence people to help and be a part of the foundation. My idea for website to build something creative and something easy to use for user not only that but to educate people on what happens around the world and how can we all play a big part in helping the organization reach the aim.

The other reason why I chose to build this website is because it is something different and something very influencing and inspiring to see how people make a change in other people's life. This website shows how much people struggle in other countries and what they go through on a daily basis. Some of their problems are tragic but motivating. The website always helps to acknowledge what people go through this is why I chose to do a website based on this organization because of how much you see these people try to help and how well organized is the foundation and fast it grew.

The process of creating the website was very simple because the organization is a well known and has inspired many people to give help to those who need it
